## RING SIZE GUIDE

### Print before you measure

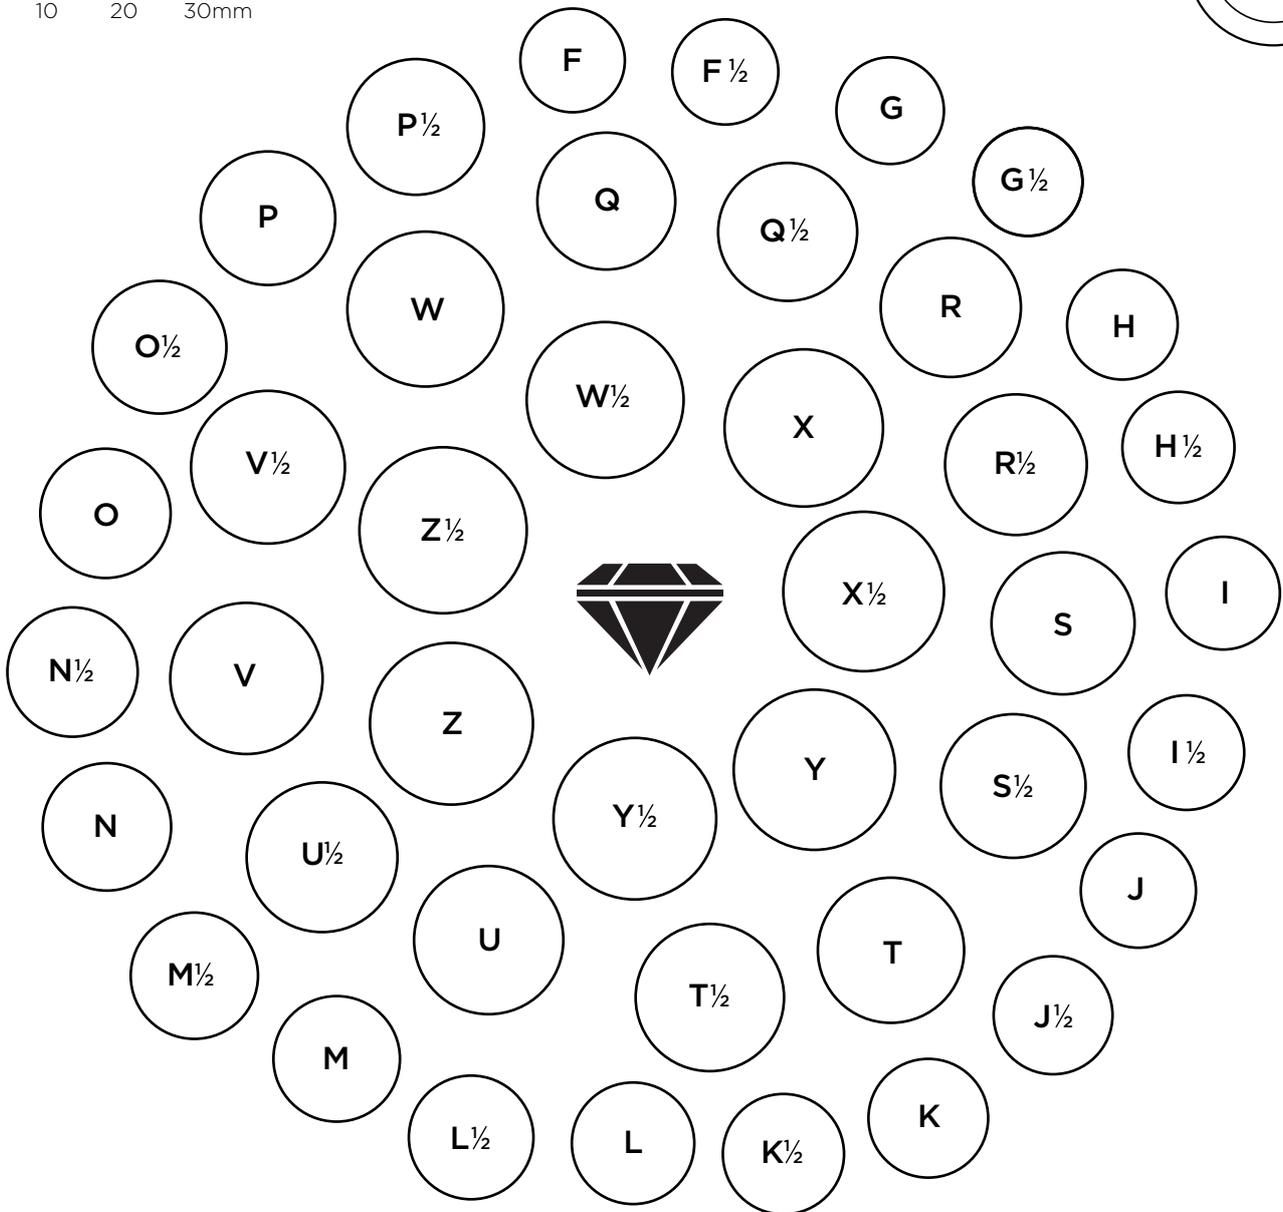

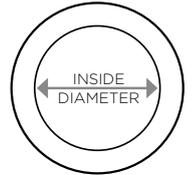

1. To find the right ring size, you'll need to carefully follow these instructions to get the most accurate measurement.
2. Before you print off the guide, make sure that "Page Scaling" is set to "None" in the print dialog box.
3. Measure the scale bar below with a ruler to make sure the measures are correct.

### Finding the perfect match

1. Find a ring that comfortably fits the intended finger.
2. Place the same ring over the circles below. While doing so, make sure you match the inside edge of the ring to the circle that is nearest in size.
3. If you can't find the perfect match and the ring falls between two sizes, always choose the larger size.

Measurements match the Inside diameter of the ring

### Still unsure?

Of course, while this chart can give you a good idea of size, the best method is to have your fingers measured by a professional. The best way to make sure you get the perfect size is to come into your local Wallace Bishop store and ask one of our staff to help you with your ring size. It is a simple job that takes a couple of minutes, plus, you can try some rings on while you're there.
